

# MediaCentral 2.8.4

## Introduction

MediaCentral integrates all media into a single application and transforms your Mac into a home theater or information center. The media-center solution from equinux supports all important audio and video formats, IP TV, movies, DVD, IP radio, music, games, pictures and Skype. In addition, it is compatible with over 20 TV receivers.

## Changes in this Version

- Startup problems, caused by public Safari 4 Beta, have been resolved
- Tuning has been improved drastically
- Now supports Hauppauge's Tri-Mode TV Tuner HVR-930C (DVB-C, DVB-T, Analog)
- Now supports PCTV DVB-T Stick 70e
- Now supports Pinnacle DVB-T Stick 70e
- Now supports Terratec Cinergy T USB XXS
- Now supports the new eyeTV DTT (introduced August 08)
- Now supports eyeTV DTT Deluxe
- Problems with older eyeTV hybrid devices have been solved

## System Requirements

- Apple Macintosh G4 1 GHz or Intel Mac
- Mac OS X 10.4 or higher
- An active internet connection
- iPhoto 5 or higher (to use iPhoto integration)
