

VPN Tracker 6.0.3

Introduction

VPN Tracker 6 is the new command center for working securely and remotely. With the new Secure Desktop, users now have access to all their most important applications, file servers, scripts and websites in one central location. VPN Tracker 6 supports 64 bit, IPv6 and unifies the latest security offerings with the most popular configuration methods from leading VPN gateway manufacturers.

Changes in this Version

- Support for NETGEAR FVS318G and NETGEAR SRXN3205
- Fixed a problem where setting routes could fail with Host to Everywhere connections
- Secure Desktop: Specifying a user name for FileMaker databases has been removed, because FileMaker does not actually use it

System Requirements

- Mac OS X 10.4 or higher
- Internet-connection (required for activation)
