

VPN Tracker 6.2

Introduction

VPN Tracker 6 is the new command center for working securely and remotely. With the new Secure Desktop, users now have access to all their most important applications, file servers, scripts and websites in one central location. VPN Tracker 6 supports 64 bit, IPv6 and unifies the latest security offerings with the most popular configuration methods from leading VPN gateway manufacturers.

Changes in this Version

- Support for Cisco ASA 5500 Series
- Secure Desktop now tries to reconnect idle connections if necessary
- Fixed display of the Secure Desktop's background image when it is positioned in the top left corner
- XAUTH now only requires the username and password/passcode fields to be filled in
- VPN Tracker can now be successfully be installed if the folder /Library/Extensions has been deleted
- Fixed an issue using SHA-2 in phase 2
- Support for NETGEAR ProSecure UTM Series
- Added new settings that can significantly speed up connecting to Cisco devices and improve compatibility (see www.equinux.com/goto/vpnt/ciscoettings for details)

System Requirements

- Mac OS X 10.4 or higher
- Internet-connection
